LIFETIME VISION CARE

Fragrance-Free Policy

A fragrance-free environment helps create a safe and healthy work space for staff and patients alike. Chemicals in fragrances have been associated with adversely affecting a person's health including headaches, upper respiratory symptoms, shortness of breath, skin rashes, and difficulty with concentration.

People with allergies and asthma report that certain odors, even in small amounts, can cause symptoms. For the safety and wellbeing of all staff and patients we have a policy in place to provide a fragrance-free environment. This policy applies to both employees and non-employee visitors.

In order to promote the health and comfort of Lifetime Vision Care staff and visitors, Lifetime Vision Care has established the following Fragrance-Free Policy.

Policy

Lifetime Vision Care requires that offices and other spaces used by employees and visitors remain free of heavily scented products. Therefore:

Lifetime Vision Care will work to ensure that employee and patient exposure to cleaning chemicals and heavy scents are limited.

Lifetime Vision Care staff and visitors are required to refrain from wearing or using any heavily scented products while on the premises. These include, but are not limited to, perfume, cologne, body sprays, aftershave, scented lotion, and similar products.

We appreciate your mindfulness in keeping our patients and staff safe. Repeated violations of this Fragrance-Free Policy may result in patient dismissal from the practice. We appreciate your compliance in helping to keep our patients and staff healthy.
